

Figure 1. Modified from Management algorithm for NICE guideline “Chronic Heart Failure in Adults: diagnosis & management”.  
<https://www.nice.org.uk/guidance/ng106>

Date of publication: Nov 2020  
 NICE decision on dapagliflozin in HFrEF expected Feb 2021

ACEi – ACE inhibitor, ARB – Angiotensin receptor blocker, MRA – Mineralocorticoid receptor antagonist, ICD – Implantable cardioverter defibrillator, CRT – Cardiac resynchronisation therapy

\*Measure serum sodium, potassium and assess renal function before and after starting and after each dose increment. If eGFR is 30 to 45 ml/min/1.73 m<sup>2</sup>, consider lower doses or slower titration of ACEi/ARBs/sacubitril valsartan or MRAs
